EXPERIENCE

MINDSPRINT

Junior Engineer

Chennai, India

JUN 2024 -Present

- Primarily worked on backend development using **Spring Boot**, designing and maintaining REST APIs, handling business logic, and resolving complex production issues; contributed to frontend fixes across React, Angular, React Native, and Android Native when required
- Managed and optimized relational databases (**MySQL**, **PostgreSQL**, **MSSQL**), improving query performance and data reliability, while supporting **CI/CD pipelines using Jenkins** to enable consistent and timely deployments
- Debugged and analyzed distributed microservices, handled service integrations, API failures, data flow issues, and performed root cause analysis to ensure reliable communication and stability across integrated systems

PROJECTS

GATHERSPACE (Full Stack Application) (Github) (demo)

- GatherSpace delivers a customizable 2D virtual environment where users create and share personalized spaces for real-time interactions—built with **React**, **Spring Boot**, **MySQL**, and **WebSockets** to ensure responsive UI and minimal-latency communication.
- Features enterprise-grade security through **JWT**-based authentication with separate access and refresh tokens—protecting user data while maintaining an intuitive platform where friends can connect, work.

T3 Chat – Unified Chat Across Multiple AI Models (Full Stack Application) (GitHub) (Live) (Demo)

- Developed **T3 Chat**, a full-stack chat platform using **Next.js**, **NextRouter** and **PostgreSQL**, integrating multiple LLMs via their respective SDKs for seamless, unified interaction without switching interfaces.
- Implemented secure authentication with **Google OAuth 2.0** and **OpenID Connect**, enabling efficient session management and user identity protection.

Code Cli (Coding Agent) (Github)

- Built a terminal-based AI coding assistant in **TypeScript** that integrates with **LLMs** (e.g., DeepSeek) to autonomously read, write, edit code, execute shell commands, and navigate codebases via natural language.
- Designed a modular agent architecture with tool orchestration, REPL interface, extensible **LLM provider** support, and built-in safety mechanisms like sandboxed file access and command validation.

SKILLS

- **Web Development** : Spring Boot, Java, Hibernate, RESTful APIs, Microservices, MySQL, PostgreSQL, MS SQL, MongoDB, Elasticsearch, React, TypeScript
- **Cloud/DevOps**: AWS (S3, VM), Azure, Docker, Kubernetes/Jenkins (basic)
- **Certifications**: Microsoft Certified: Azure Fundamentals, The Complete React Native + Hooks Course, Spring Boot 3 & Spring 6 & Hibernate for Beginners, The Complete Web Developer in 2023: Zero to Mastery(Udemy), The Complete Node.js Developer Course(Udemy), Modern React with Redux

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

B.TECH. in Computer Science CGPA 9.5/10

Chennai, India

SEP 2020 -Jun 2024

ACHIEVEMENTS

- Solved more than 600 problems in various Coding platforms
- Solved more than 500 problems in [Leetcode.com/harikrishna](https://leetcode.com/harikrishna)
- Solved more than 150 problems in [geeksforgeeks/harikrishna](https://www.geeksforgeeks.com/harikrishna)
